***Travel + Leisure* Names 10 New American Landmarks**

**List Reflects the Best of What Sustainable Design Looks Like Today:
Iconic Green Sites, from a Skyscraper to a Baseball Stadium,
Featured in T+L's November "Responsible Travel" Issue**

New York, NY (October 23, 2008) – *Travel + Leisure* recognizes outstanding sustainable design by naming 10 places, including **Nationals Park** stadium in Washington, D.C. and **California Academy of Sciences** in San Francisco, to its list of **New American Landmarks**, all of which are changing the traveler's landscape with modern, environmentally tuned design. This special feature is in the magazine's November issue, on newsstands and on www.travelandleisure.com now.

Nancy Novogrod, editor-in-chief of *Travel + Leisure*, says: "Green design has really come into its own during the past few years, not only for its high-tech, energy-efficient sustainability, but also, just as important, as an aesthetic ideal--green is not only good for the planet, but can be beautiful, too. The 10 American landmarks we celebrate in this story deserve recognition for their good looks and the influential statements they make about sustainable design."

***Travel + Leisure's* 10 New American Landmarks**

- **California Academy of Sciences**, San Francisco
- **Nationals Park**, Washington, D.C.
- **Stone Barns Center for Food and Agriculture, and Blue Hill at Stone Barns Restaurant**, Pocantico Hills, New York
- **5.4.7 Arts Center**, Greensburg, Kansas
- **The High Line**, New York City
- **World Birding Center**, Bentsen-Rio Grande Valley State Park, Mission, Texas
- **Santa Monica Civic Center Parking Structure**, Santa Monica, California
- **Sears Tower**, Chicago
- **Cavallo Point—The Lodge at the Golden Gate**, Fort Baker, California
- **Cor Tower**, Design District, Miami Florida (Projected Completion Date 2011)

These landmarks implement a variety of eco-friendly strategies, such as photovoltaic panels, green roofs, and wind turbines.
